U.S. Patent and Trademark Office PTOL-326 (Rev. 08-06)

Application/Control Number: 10/807,947

Art Unit: 1761

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-10, drawn to a container and a coating, classified in class 426, subclass 132.
- II. Claims 11-15, drawn to a method of applying a substance to a rim of a support for a consumable, classified in class 426, subclass 420.
- III. Claims 16-20, drawn to a "film" classified in class 426, subclass 658.

The inventions are distinct, each from the other, because the article as claimed in Group I can be made by methods other than that recited in Group II. For example, the composition that is applied to the rim in Group I could be preformed into a film and then applied to the rim as opposed to applying the composition in liquid form as claimed in Group II. Also, the article in Group II does not require an addition of a substance to the film composition before or after applying the film composition to the rim.

Further, the film composition as recited in Group III, can be associated with articles other than that recited in Group I or Group II, or not associated with any article and employed as just an edible composition of any shape or just an edible film. Such other utilities that come to mind are carriers for breath fresheners or medicinals or a flavor carrier for a tongue depressor for a child.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art, requiring separate searches, as

Application/Control Number: 10/807,947

Art Unit: 1761

shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven L. Weinstein whose telephone number is 571-272-1410. The examiner can normally be reached on Monday-Friday 7:00 A.M.-2:30 P.M..

Application/Control Number: 10/807,947 Page 4

Art Unit: 1761

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Milton Cano can be reached on 571-272-1398. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
